## About This Game

Fight your way to the top in DragoDino, an epic adventure set in an ever changing world!

Meet Bob, a DragoDino, and guide him through the 10 levels of the Forest Kingdom in a quest to recover his lost egg stuck atop a giant tree.

Explore and fight enemies to reach ever higher, collecting powers on your way up to help you in your quest. But be careful, the guardians you'll meet won't let you through that easily.

Mix and match power ups, play as various DragoDinos, taking advantage of each one's abilities. Enjoy 2 difficulty modes, plus a free mode to practice and improve. In solo or in co-op, rise to the challenge!

## Key Features :

- 10 levels
- 2 difficulty modes : normal (3 lives & checkpoints) / hardcore (1 life, no checkpoint)
- 2 playable characters with 2 skins
- 40 power Ups

- 
- 50 enemies
  - 3 bosses
  - a local co-op mode
  - a cartoon world
  - 2 unlockable characters
  - Special Items revealing Story Content
  - original soundtrack

very simlier to the final approach vive game but just doesn't have anything on it as you dont have 2 hands, your hands are basically were you look lol just look at were you want to use the hose or air horn and press a button on a xbox control, got really board after 1 mission. Was really hoping that you would be able to be in the actual plane in first person when flying but nope thats just thrid person :( i didnt get to were you start throwing there suitcases in the right containers was fun with vive as you actually have to physically pick up and throw them but i can imagen for oculus you just press A,B,Y,X YAWN!. Tank Universal is a fun game. it is an RTS game with tanks. OBVIUSLY I CANT SEPLL. The Artwork and level design is just fantastic. Get it if you can,. Incredible game, great gameplay and storyline. Music great and relaxing. 10/10 from me. Great job gentlemen :). shows potential as a classic overhead arcade shooter but right now it crashes randomly, its literally a Flash game on Steam, the inventory system makes no sense, the enemies are too tough, and the developers just took pictures of themselves and made those cutscenes. Fun adventure for 2 hours if you have more than 7 years old and speak english.. A fun game, but very short. This game is fun but short, and seems to also get sales by providing alphabet and symbols for its achievement icons making them useful in steam showcases, as well as providing some decent steam backgrounds.

I recommend buying this on sale, perhaps as part of the bundle which is made up of similar games and achievements.

This review is also the same for all of the other zup games ive played.

. In a time where racing cabinets lined the now mostly gone arcades, standing out from the rest with their replica seat and steering-wheel set-ups. Top-down racers like Super Sprint paved the way for a whole generation of multiplayer oriented racing that would later find its home on consoles in the form of legendary series like Super Off Road or Micro Machines. For such a memorable genre that had shaped the early experiences of many racing game players, it's disappointing to see its popularity waning in recent years. Mantis Burn Racing seeks to bring glory back to the genre with gorgeous modern visuals, pitch-perfect controls with a seriously weighty and realistic feel, bucketloads of content and all of the multiplayer and online features you could possibly need.

Mantis Burn Racing is much more than your usual top-down racer, though. With at least 8 different modes including your usual racing across a sprawling progressive campaign, there's enough content here to rival your typical AAA racing title. There's everything from Elimination rounds to adrenaline pumping Overtake matches, and of course self-testing Time Trials for a little less chaos. The two locales the numerous variations of tracks take place across are gorgeously detailed and realistic, a sandy desert filled with plenty of dunes to jump and winding city streets of a metropolis set the stage for a diverse set of complex and intense races.

It didn't even matter when the setting stayed the same, because each track was so wildly different from the last. Each level throws new tricks, new twists and turns, and more beautifully rendered scenery to look at. Hitting jumps over winding rivers and drifting under the flowing waterfalls, each stage of the campaign offered something new both in gameplay and incredible setpieces. The switches from the bright and warm daytimes of the desert to the cool and dim visuals of the city night sky make you feel like you're playing an almost entirely different game, and give a seriously genuine atmosphere for all kinds of drivers.

---

Visually, Mantis Burn Racing sets a new precedent for top-down racing, and hopefully this is enough to give the genre its much needed comeback.

This is a classic arcade racer in every sense, including difficulty. It eases you in with relaxing rides and helpful upgrades, but soon in the campaign you'll need fast reflexes and quick maneuvering. Mistakes are not recoverable, so having your wits about you at all moments is mandatory. Slamming into a boulder or a barricade will bring your vehicle to a full stop usually, and leave you in the dust only able to watch the competition whizz by. With three distinct car classes and various skill tiers throughout the campaign, I was already repeating races for upgrade points on Rookie. It's challenging and demands lots of practice, but Mantis Burn Racing is also very customizable and has a whole lot of variety to keep your options open and your practices interesting as you pave your way to professional driving and drifting.

The key to winning in Mantis Burn Racing is slick and tricky driving. As you pull off each drift, each jump, draft and overtake your boost meter rises, pushing you to drive stylishly. When the meter is filled your nitrous boost is ready, and when used with proper timing can propel you past the competition in a heartbeat. Attempting to drive with skill is an addictive process, it takes time but the feeling of driving in Mantis Burn Racing is so good, so slick and precise that practicing is nothing short of pure pleasure and adrenaline.. I died literally 9 times in the first room....

Not for the meek but an awesome soundtrack and atmosphere. Can't beat the first boss yet, it reminds me of the old Megaman games, but in a 3 point perspective.

Kind of makes me wan to die though, as a Dark Souls, Cuphead, and fan of a challenge, to not be able to get past a little robot spider means developer did it right. Going to make you want to break your computer I think (dont do it though)

I NEED the soundtrack though, really 80's, can't wait to hear more.. I have not played this game that much, but from what i've played i got the gyst of it. If you liked runescape or any old mmorpg then this is great, just watch out for the music. you wouldnt expect that kind of music in an rpg, its not the one on the ad. so if you liked runescape or any old late 90s early 2000s rpg, this is for you.

Spent a few hours on this, cleared one girl, and based on the difficulty of doing that, I can't wholeheartedly recommend this game as compared to something like Hunie Pop.

The puzzles are very easily solvable with a notecard and pen (even at the hard levels, where you have a full ten seconds to jot down where the ice cubes are) and the game is Hunie Pop Light when it comes to getting the info you need to woo the girl you want. I cleared the route I won with a week left to spare, and on the second playing would likely do it with ten days left. Speaking of the girls, there's literally nothing new here. You have the childhood friend, the class rep, the tsundere, the ojoosama, the airhead, the onesan, the muscle girl and the frail girl.

The art's good, especially if you're into oppai. Most of the girls are ridiculously well-endowed, and you'll get to see all their assets in the puzzle game.

On the whole, at ten bucks it's worth an afternoon if you're an achievement hunter, but this definitely lacks substance. Which is fine if all you want to see are some anime boobs.. If you are that kind of person who loves asian ghosts and horror movies such as The Grudge and The Ring this game would be perfect for you. It's really nice that on the first hand is a visual novel with characters that doesn't speak and on the second hand that you got decisions to make.

The game has 6 endings and so far I only did 3. One of them was really sick and my subs was freaked out of it. So it was worth it for me.. EDIT: The dude's remaking the game, so definitely keep a watch on this.

This game has a lot of promise. I'm a big fan of the graphics, weapons, combat and general feel of it. It's pretty awesome to dock with an abandoned ship to search for supplies, only to have a hoard of aliens and nano-zombies try kick your balls up through your mouth. However, it's got a decent amount of glitches and really not all that much to do. You kill and search a ship, planet or space station for, hacking tools, medkits, explosives and ammo so you can kill more. There seem to be missions in, but I'm not sure if they even work. It seems like it should be in early access. It's definitely not worth the \$10 price tag, but would be if there were more additions to it.

I really, really wanna give this game a thumbs up.. meh its not even good arcade :/. I do not recommend this game for anyone. I spent my play time wondering - is this really what I'm supposed to be doing? Am I running the right dungeons, am I leveling my characters properly, am I using the right materials, am I buying the right gear, should I be changing my classes? No clear answers emerged, and the whole time I was bored by the tedious dungeons and combat.

Combat is simplistic, either your front row melee attacks or 1 back row guy does something at range. Dungeons and monsters all feel the same.

There's minimal customization for characters, to the point where it feels like you have almost no control over their progression.

There's dozens of "Master" dungeons but they're unsorted with no way to filter for ones that match your level range.

There's lots of different items but none are interesting. Both in your bag and in the shop, you can't filter them by class, and there's no comparison to what you have equipped. Also some of the item text is just confusing - does "projects an ominous aura" actually affect combat and if so, how?

Despite a mountain of text in the help file, lots of things are unexplained or explained poorly. What does "Hit rate" mean and is it better higher or lower? What do "Fellows" do? And so on.

Grindy, dull, frustrating, unrewarding. Avoid this game.. i dont really like this game, its glitchy and usually its confusing for most new players, it took me about a few weeks to get used to it (i didnt play it all the time) i wouldnt reccommend it and for the time i bought it a bit ago, even then i knew this game was pretty bad, save your money and get something else for more cheaper, it would probably be better quality then this

p.s. i now know how buses make new buses.. (just dont play this game if you dont wanna know). Airbuccaneers is an amazing, great concept. I would absolutly buy and play a full out console version. This game is about two teams, Vikings and Buccaneers, in a sky battle. I love the thought that the creators put behind each ship. The ships that you can control vary from hang-gliders to 1 person ballons all the way to a huge command ship. Each base is well defended with ground cannons and gametypes include a king-of-the-hill and normal points battle. The characters have great items that can be equipped.

The main problem is THAT NO REAL PLAYERS ARE EVER ON THE SERVERS! They have bots that fill a few spaces on each team, but nothing like the game play shown in the trailer. I would not recommend this game until it becomes populated, but

---

I have little hope that this game will make a comeback.. A fun "Arcade-y City Builder". I definitely recommend it. Yes, I know this review sucks, but I'm too tired to type a better one but I wanted to leave Positive Feedback on a game I like so much.. Gameplay gets old, humor isn't really there.. rarr die peasant rarr
